Fabric choices include:

A. COTTON JERSEY #CJ-TANK It is hard to give up the comfort and breathability of this soft 9oz cotton jersey. Most colors available for your teams special look.

B. DRYTEX #DT-TANK Quick dry wicking polyester fabrics. This isn't the 1970's leisure suit stuff you're thinking of. When you read the fabric content label of your modern high performance fitness shirt you will see "polyester". These polyester fabrics have been re-engineered, making them quick drying, breathable, soft and comfortable to wear.

C. MICRO MESH, cool and durable #MM-TANK
 This fine mesh fabric is comfortable to wear in hot & humid climates. Its 100% nylon construction makes it fast drying and non water absorbent. This material is lightweight and breathable. Women's tanks have 2 layer front panel.
